Taft Not To Allow Insult To Russia

WILL VETO ANY RESOLUTION PERTAINING TO CAUSE ILL FEELINGS.

JEWS READY TO FIGHT.

Boston, Dec 17—That one hundred thousand Jews stand ready to enlist and fight against Russia should insistence upon the rights of American citizens bring about war, was the declaration of Rabbi M. M. Eichler at a mass meeting at Faneuil Hall tonight.

Washington, Dec 17—The Russian treaty situation cleared materially today and the administration's plans for abrogation of the 1832 pact with the St. Petersburg government became more definitely known. President Taft, it is said, intimated that he would veto the Sulzer resolution instantly if it should be forced through the Senate tomorrow without amendment. Nothing that can be construed as insulting to Russia will be passed if the President can help it.

It was said tonight that tomorrow Mr. Taft will outline plainly and tactfully to Congress one a message and the other a letter to the Senate Committee on Foreign Relations. In these communications it is said Mr Taft will out line plainly and will call pointed attention to the fact that international relations are not lightly to be dealt with. Despite the advice of certain of the Republican leaders of the House that the lower House should be consulted in the matter, President Taft tonight, was said to be determined to ignore the House entirely in his further dealings with the Russian situation.

Senate leaders expect to hear tomorrow through American Ambassador Guild at St Petersburg that he has already notified Russia of the expectation to nullify the treaty. This not will be couched in the highest terms of a dignified language and will state that the American people have come to regard the treaty as obsolete in many of its provisions. The expiration of the treaty is fixed for January 1, 1913.

President Taft is said to have taken the ground that if he chooses he can abrogate the treaty by executive decree without waiting for or taking into consideration any possible action of either the House or the Senate. He is supported in this view by various members of the Senate Committee on Foreign Relations and said to base his attitude on precedence laid down by former presidents.

Difference of Opinion Exists.

There appeared to be a decided difference of opinion today between the House and Senate leaders as to what part the House should play in the abrogation of the treaty. The House held that the treaty was the supreme law of the land and that abrogation it without a new treaty to take its place a law was being repealed. Under these circumstances members pointed out that action by the House was essential. Senate leaders contended that treaty making and treaty breaking were the functions of the president.

One of the president's communications tomorrow will dwell at length on the friendly relations which have long existed between this country and Russia and will say that while the termination of the treaty of 1832 seems desirable, the friendship between the two nations is of too long standing to be lightly brushed aside and possibly broken.

Mr Taft, it was said pointed out that Russia because of her friendship with the United States, had listened to America's proposal of peace in the war with Japan. It is asserted that Russia would not have received any such suggestion from any of her European neighbors.

Tax Levied on Russians

Those professing to know the president's purpose all declare tonight that he will call attention to the fact that the United States levies a head tax on all the Russian subjects who enter this country and would not for a minute entertain a suggestion from Russia that the right to do so was debatable.

In many of his speeches in support of the arbitration treaties with Great Britain and France the president has expressed the view that each country has the right to say who shall and who shall not enter her domain.

What," exclaimed Mr Taft on one occasion, "we could not hold red headed men from the United States if we wanted to? Of course we don't want to [illegible] men make [illegible] merely [illegible] arbitrary [illegible] law resting in [illegible] tion of immigration [illegible] one.

It was generally believed tonight that the Senate would solve the problem tomorrow by passing a resolution [illegible] strictly formal language. Before this can be brought about however likely sessions of the foreign relations committee and the Senate itself are expected. The committee meets at 11 a m. The Senate will not convene until 2 o'clock.

IMPORTANT QUESTION IN ALABAMA POLITICS

MUCH INTEREST AROUSED OVER MEETING OF DEMOCRATIC COMMITTEE

Birmingham, Ala Dec 17—The State Democratic Executive Committee will meet in the city hall in Birmingham Wednesday at noon and one of the most interesting sessions held in years is looked for. Many politicians from all parts of State will be here for this meeting and the eyes of the entire country will be directed this way.

Questions of importance not only from a local or State standpoint will come up, but from a National view. The convention plan or primaries for the selection of delegates to the National Democratic Convention is a question that is arousing much interest and it is difficult to predict right now what is going to be done.

The Underwood followers those who want the delegation first instructed and all the time, for Congressman Underwood for the Presidential nomination at the National Democratic Convention are said to desire a convention while others the Wilsonites are more in favor of the primary plan.

The committee has other business which will attract attention and in all probability the meeting will continue through the entire afternoon and into the night. The new primary laws make it incumbent upon the State committee to look after any matters. For that reason the various counties of the state which have questions of interest under discussion are looking foward to the meeting of the State committee.

DOTHAN POST OFFICE SHOWS BIG INCREASE

At the end of this fiscal year the business done by the Dothan post office will show the greatest increase of the city. The sale of stamps money orders issued and paid and other lines of business will help mark the prosperity of Dothan and the increase in the Dothan post office. On last Saturday the Dothan office [illegible] $1161.0[illegible] showing a great increase in this line not considering the amount paid out. The register [illegible] is [illegible] higher than it this [illegible] year ago.

GASOLINE CAUSES DAMAGING FIRE

SCORES OF SUITS OF CLOTHES RUINED BY BLAZE IN LOCAL TAILORING SHOP

A damaging fire was caused by an explosion of a small amount of gasoline this morning about nine o'clock when about twenty suits of clothing were ruined in the pressing department of the Williams Tailoring Company.

The gasoline was in the tub on the floor when a spark from the iron heater fell into causing the blaze to spread rapidly over the rear of the shop. The fire department was called out and extinguished the flames with aid of chemicals. The clothing that was ruined was the property of the patrons of the pressing department and had just been sent in for the Monday pressing. The smoke and fire did considerable damage in the rear of the shop but fortunately did not spread to the front end where the hats tailoring and other furnishings were kept.

Fire Chief Jones and one of the firemen Jesse Seay in running up the alley from the fire department to the scene of the blaze ran into a glass door and received severe small cuts about their arms.

The funeral of J. M. Davidson who died here Friday night as a result of being injured at Panama City, was laid to rest in Columbus Ga yesterday. Mr Davidson was 21 years of age and a member of the Catholic Church.

Miss Corrinne Fleming of Slocomb spent a while here today en route home from Cottonwood where she has been visiting as the guest of Miss Georgia Bell Carroll. She was accompanied to Dothan by Miss Carroll.

SEVEN COACHES JUMP TRACK AND TIE UP TRAFFIC ONE MAN INJURED.

All traffic in this vicinity on the Coast Line road was tied up for a while this morning to to a near-serious wreck occurring at Ashford, or at least about a mile west there, when train No 57, due here at 4 50, in the morning, jumped the track. L. B. Jones, of Campbellton, was injured internally.

Six of the long string of cars jumped the track entirely and another was thrown partially off. None of the cars turned over and fortunately ran into the road bed during the entire time. The engine nor the two Pullman cars on the rear did not leave the track and were none the worse for the accident.

It seems that the wreck was caused by a loose wheel on the express car that caused the rail to spread. The express car jumped throwing the rails apart and the other cars followed. The engineer, who fortunately was pulling the train slowly did not know of the accident until after the conductor had pulled the brake line.

Jones was hurt by being thrown against a seat. His injuries are serious but not fatal.

Quite a lot of inconvenience was caused a large number of passengers here by the wreck, owing to [illegible] in the the passenger trains.

THE SHOW BUSINESS.

A wail is coming up from the actors, that many of them are out of work because of the growing popularity of the moving picture business. We think we know the reason. At the moving picture shows, the show doesn't wait till nine o'clock, till the crowds begin to assemble The pictures go, waiting for no man, and most of the theatres advertising the curtain at one hour, and just about an hour later, the curtain rises.

For years we have been predicting reform along this line, and now that the pictures shows are putting the other shows to the bad, is good news to us.

If a show is to start at a certain hour at night, it should start at that hour, if no one is in the house but the holders of the complimentary tickets.

THIS WEEK.

There are hundreds of clerks, delivery boys and other employes of the people of Dothan who will be overworked during this week. Matters not how well things are planned they will have to much more work than they usually do This can be remedied to a great extent if the buyers will use care in making their purchases They should try to give their orders soon enough to insure prompt attention, and this can be done, if system is used The people who are doing the work have hundreds of others to attend to, and they usually take it like going to mill, first come, first served Place your orders regularly, and then don't expect it unreasonably quick Don't phone telephone unless it is absolutely necessary, for telephoning a busy place takes up time, and the phone will ring hundreds of times during the day. Probably

Think of what you want to buy, and get a list of it Go about it with system, and that will help all concerned some, and the goods will be more promptly delivered, and the possibility of errors are reduced materially

BIRDS AS LIFE SAVERS.

One can hardly think of a frail little canary bird playing an important part at the grim business of rescuing entombed miners

Yet that is the role they enacted at Briceville following the disaster there, and were instrumental in recovering alive five of the well nigh suffocated miners.

It is their very frailty and sensitiveness that render them valuable for the service Like Shakespeare's sumer haunting martlet, where they go the air must delicate

The government bureau of mines has found that they are accurate resisters of the conditions of the air as to its wholesomeness and freedom from poisonous elements.

The birds are taken into the mine by the first line of rescuers, who are supplied with oxygen helmets and are followed by a second and more numerous line not helmeted The second line, because of their unhampered condition, are relied upon to do the more active work of recovering and bearing the unconscious men to the surface

As soon as poisonous gases are encountered, the canaries show it by becoming drowsy. The unhelmeted members of the rescue party know then that it is not safe for them to proceed farther until the air has been purified.

The birds thus serve to indicate in the corridors and passages the presence of good air as plainly as if it were marked by huge signs along the way

State laws and state inspectors seem sadly ineffective in preventing mine disasters The Federal government however, in doing splendid work in the organization and discovery of the use of canary birds may be put in connection therewith must be credited to it as a noteworthy achievement.—Atlanta Georgian

VITAL STATISTICS LEGISLATION.

Legislatures will meet this winter in Kentucky, Louisiana, Maryland, Massachusetts, Mississippi, Jersey ,New York, Rhode Island, South Carolina and Virginia In four of these states.—Louisiana, Mississipi, South Carolina and Virginia —there are no provisions whatever for the proper registration of births and deaths, except in a few of the larger cities where there is some form of registration Strange to say, says The Journal of the American Medical Association, all four of these are Southern states, where, on account of former epidemics, a reputation for good health conditions should constitute a most valuable asset

How many people died in Mississippi last year of malaria? What was the total number of deaths last year in the four states? Is the death rate rising or falling? Is the amount of sickness increasing or decreasing? Nobody knows, because they is no record kept of births or deaths in these states. How strange that men will carefully record all business transactions will insist on books being kept correctly, even to the differents of a penny, will record the birth and pedigree of their horses, cows, pigs, dogs and cats, but will permit their parents to die and be buried and their children to be born without any legal record of those events being made! Bank balance sheets, corporation reports, auditors' reports are all recognized as records of value, but only in twenty-four of our states do we know how many human lives are lost each year, for in the other twenty five states no books are kept In only nine states are any birth records kept, and even in these states such records have been kept only a few years In the coming report for 1910, the disgraceful fact appears that our death ratio is based on returns from only 58.3 per cent of the entire population, since among the remaining 41.7 per cent there is no way of determining the number of deaths This situation has long been adisgrace to our nation In Alabama, Florida, Georgia, Kentucky, Louisiana, South Carolina, Tennessee, Texas and Virginia an effort has been made to register deaths in the larger cities in none has the general registration of death or any recording of births in any way been provided for. In Louisiana, Mississipi, South Carolina and Virginia, the coming session of the legislatures offers an opportunity to atone for longstanding neglect of this important duty. One of these states can have the honor of being the first southern state to make proper provision for the recording of births and deaths Which will it be?

CAN TAFT BE RENOMINATED?

When Taft's friends point to 1892 as proof that he will be renominatd they are only whistling to keep up their courage

The President, in so far as he is willing to be satisfied with a renomination can draw a measure of consolation of the Harrison situation but the parallel is not so convincing as it was a year ago or even six months ago

Harrison was nominated in 1888 by a Republican National Convention as a comprimise candidate Taft was forced upon a Republican National Convention in 1908 by Roosevelt Except for Roosevelt, Taft could not have been nominated, and therefore the Republican party has never really assumed responsibility for him He is still Roosevelt's President, repudiated by his maker.

In 1892 the opposition to Harrison was largely personal. He had grievously offended many influential Republican leaders. At the same time he had very strong and aggressive and powerful friends. Taft has not personally offended anybody except the Roosevelts, the Pinchots and the Garfields, but neither has he drawn any of these party leaders to him Making enemies is often a great advantage to a politician, provided he has also made the right kind of friends, but Taft has not made either

The Federal machine was relatively much stronger in 1892 than it will be in 1912 The Northern States are getting out of the habit of allowing Federal office holders to control the delegates and the Southern delegates would desert Taft for anybody who stood a better chance of election

The main difference, however, between Taft and Harrison, is in the character of the opposition Blaine had been defeated for the Presidency in 1884. He more or less credited politically His candidacy in itself was an act of treachery toward the President who appointed him secretary of State, and the whole fight against Harrison was an eleventh-hour affair

Taft must deal with Theodore Roosevelt, who knows more about Presidential politics than a hundred Quays, who has a larger personal following than Blaine who was elected President by the largest popular majority that any candidate ever received, and who is the inspiration of an extraordinarily shrewd and adroit campaign against the President Moreover, Roosevelt has Wall street back of him in his opposition to Taft! he has the insurgents back of him, and he is sure of sympathetic consideration from the Republican reactionaries who are trying to save the United States Senate

Everybody admits the Republican party is shot to pieces. Most well-informed Republicans believe that Taft will be overwhelmingly defeated and that victory would be difficult with any candidate Roosevelt is a desperate chance, and even Republican politicians who do not like him would accept him in a last effort to save their own political baron

In 1892 a very large element of the Republican party was loyal to Harrison. None of it is loyal to Taft.

Tolstoy remarked in the opening chapter of "Anna Karenina" that "all happy families resemble one another, every unhappy family is unhappy after its own fashion" It was Harrison's unhappiness that he could be renominated but could not be re-elected. It is Taft's unhappiness that Roosevelt makes even his renomination doubtful.—New York World.

Paradise of the Pacific Not in a Will That Promised.

The Nation Born in a Day Does Not Refer to Heathen Conversion, Says Pastor Russell, but to "the Church Which is the Body of Christ"—"Whose Names Are Written in Heaven."

Honolulu, Ha wall December 17 —As our ship neared your beautiful island I thought back a century to the time when these islands were uncivilized. It call ed to my mind the text, Who hath heard such a thing? Who hath seen such things" Shall the earth be made to bring forth in one day? Shall a nation be born at once"—Isaiah lxvi, 8.

Then I thought of how your island has been styled the Paradise of the Pacific." The reality surpasses my expectations Yet as I think of the glorious conditions which the Bible tells us shall prevail throughout the whole earth under Messiah s Kingdom I perceive that even the "Paradise of the Pacific" falls far short of the Paradise of God."

God has declared that the earth is His footstool, and that in due time under Messiah s Empire He will make the place of His feet glorious.

The Last Enemy Death.

It is because God has already dealt bountifully with your island and given you in advance many of those blessings promised to the whole earth that your island is styled a Paradise. Nevertheless, you all need to pray with the remainder of mankind for the coming of the Kingdom of Messiah and its blessings—"Thy Kingdom come, Thy will be done on earth as it is done in heaven."

Your cemeteries were early in evidence telling us that here, too, in this Paradise, men die Your hospital and physicians' signs tell us that here, too, men are sick. But in the Paradise which God has promised to establish under Messiah s Kingdom, the inhabitants will not say, "I am sick." Ultimately there will be no more sighing, no more dying and no more crying because all the former things of sin and death will have passed away and He that shall sit upon the throne will make all things new (Rev xxi, 4 5)

The Holy Nation Born

Pastor Russell expounded his text, showing by the context that it refers to the resurrection of the Church He declared that the begetting of the Holy Spirit in the present life constitutes God s people embryo new creatures in Christ that this begetting and embryo development according to the Scriptures concludes in death and that the resurrection moment the attainment of glory honor and immortality as spirit beings beyond the veil will be the birth of this new creation of God—the elect Church—the Bride the Lamb s wife

Pastor Russell pointed to the declaration of the Apostle that Jesus in His resurrection became the First born from the dead the First born among many brethren who attain a similar resurrection and who are therefore said to share in His resurrection

Our text points us down to the thousand year day of Messiah s Kingdom—the day so long foretold—the day of earth s blessing in which the Sun of Righteousness will scatter the darkness of sin and bring blessings to all mankind It is the Psalmist who tells us that the Church will be blessed of the Lord in that glorious day but in advance of the world Thus we read God will help her right early in the morning. (Psalm xlvi 5)

That privileged time in which the Church will be helped in which she will be passed from earthly conditions to heavenly conditions is in our text spoken of as her birthday St Peter tells us that the Church is the Holy Nation to which God frequently refers in the prophecies (I Peter ii 9) The Head of the Church was born from the dead more than eighteen centuries ago the Body is to come forth now the Holy Nation complete perfect and fully equipped by the lessons and experiences passed through in the present life

To this Holy Nation will be given the control of the world under the supervision of her Lord and Redeemer "To him that overcometh will I grant to sit with Me in My throne — I will give him power over the nations—he shall rule them with a rod of iron Through this nation blessing is to proceed to all the families of the earth

Look Now at Our Text

Verse seven pictures the Church as a mother and pictures Messiah as a man—the Head of the Church which is His Body This is the great Deliverer referred to by St Paul in Romans xi 26 He it is that coming out of Zion shall be the Deliverer of Israel, who shall turn away ungodliness from Jacob Verse 9 connects the resurrection birth of the Head with the resurrection birth of the Body Would God bring forth the Head, Jesus and then fail to bring forth the Church, His Body? Nay verily! His faithful shall share in "His resurrection as promised.—Philippians iii, 10.

WRITES TO SOLDIERS.

Mexico City Dec 16 —Crouched behind a pillar in the corner of the court yard in the barracks in Cuautitlan state of Mexico Lieut Ceferino Munoz of the Tenth Cavalry yesterday own a gun fight with twenty mutinous troopers

During the day the men had drunk a quantity of tequila and as its effects became apparent their dislike for the life of the enlisted men grew to the point of determination to leave the service without the formality of a discharge Shouting, viva la libertad they made a break for the doors of the barracks Lieut appeared and ordered them to quarters but the men opened fire on him None of the bullets struck him and from his post behind the pillar he fired into them with his revolver His single shots were effectually returned and at the end of the fight three troopers were dead and seven al wounded.

The remainder he sent to the guard house reporting the incident today to the War Department.

CHAS W. MORSE ASKS FOR HIS FREEDOM

Washington D C Dec 16—The application of Charles W Morse the convicted New York banker for a commutation of his fifteen year sentence on account of the serious condition of his health probably will be disposed of by President Taft early next week

The settlement of the matter awaits a report to Attorney General Wickersham from the army physicians at Fort McPherson Ga where Morse was removed for observation giving a comprehensive expert opinion as to the state of the banker s health

Dothan, Ala,

Dear Sir Clear pine and pine full of knots are two different things they are both called pine

Clear paint and paint adulterated with whiting, china-clay ground stone, barytes benzine and water are different things they are both called 'paint

It takes less labor to work clear pine than pine knots and costs less money

It takes less labor to paint clear paint than half whiting or half china or half ground stone or half barytes These mixtures make more gallons not more paint There s no more milk in two quarts of milk and water than in a quart of milk If you paint two gallons for one you pay double for labor and labor costs more than paint

You know how it is with lumber and knots It s the same with all paint and half paint

A day s work is a gallon of paint or half paint

Apply it to business Suppose you have two houses same size paint one Devoe the other the other prominent paint in your town

It takes 10 gallons Devoe and 15 gallons of that other paint whole job $71 25

And which wears best clear pine or pine knots Devoe wears better than the weak paint

What warrant is there for saying that paint is weak It takes more gallons

Yours truly

What to Eat

YOUR daily problem of what to eat is very easily solved—

pass it on to us. It is not what you eat that has alone to be considered---it is the quality of what you eat It is easy to say "Let's have some special dish for dinner," but the mere buying of the materials for that dish does not make your dinner a success. You must have the best of everything to get the fullest enjoyment from the meal.

Our reputation is built on selling the best of groceries. We have studied the "what to eat" problem for our own sake as well as yours.

Come in and let us talk it over

MR CHAPMAN MOVING

Mr W R Chapman and family, are moving today into their pretty home, recently remodeled on West Main Street

You hear a good deal now-a-days about "guaranteed" merchandise; especially shoes.

Sometimes it's a guarantee that the shoes are made of good leather, with a lot of detail about the way theyre made. Selz shoes are guaranteed to be satisfactory to you. What do you care what the shoes are made of if they're not satisfactory to you.

Sometimes it's a guarantee that the shoes shall wear a certain length of time; Selz shoes are Guaranteed to be satisfactory to you. What difference does it make how long they last, if they're not satisfactory. The longer dissatisfaction lasts, the worse off you are.

Selz shoes are guaranteed to be satisfactory; and that means your satisfaction, not ours or Selz. It means good leather of course; poor leather wouldn't be satisfactory. It means long service, of course a shoe that wears out too soon isn't satisfactory. It means correct style and fit you wouldn't be satisfied with anything less.

BANKS READY TO RAISE SYNDICATE'S BID $10

Montgomery Ala Thanking the initiative of this state Montgomery county farmers in a mass meeting today emphatically declined to accept the offer of the New York syndicate to brokers headed by Colonel Robert M Thompson to advance $ 5 a bale upon the cotton held for an advance in price

Objection was raised on the ground that it is unwise for the S[illegible] [illegible] $1 [illegible] charges and 2 [illegible] per farmers to give up their title to their cotton [illegible] chance over the price cotton as the syndicate's contract [illegible] at the time the certificate was issued provides

John W. Knight Is Acquitted By Jury

Eufaula Ala Dec 1 The jury trying John W Knight charged with fraudulent use of the mails in connection with forged cotton bills of lading tonight rendered a verdict of not guilty

The jury was out seven hours and forty minutes The strain was in tense in the court room during the afternoon but when the jury was filed off to report the general impression prevailed that a mistrial would be the outcome

Knight kept his nerve throughout the afternoon and stood in the hall way talking with friends A great many of the spectators who had been attending the trial daily had left the building when a few minutes after 9 o'clock the jury sent word that a verdict had been reached Judge Goodwin was notified and had the jury called down immediately As the jury filed in he cautioned the spectators against making any demonstration

The clerk read the verdict We the jury find the defendant NOT GUILTY

Mrs Knight wife of the defendant, gave way to her feeling for the first time during the nine day trial and sank to her chair weeping She arose after a moment however and walked over to the jurymen shaking hands with and warmly thanking each of them Mrs Knight's mother followed her and shook hands with each juryman Knight was almost overwhelmed with congratulations in the court house corridors and on the streets He and his wife and mother left tonight for their home in Decatur

The Federal court has adjourned and four other cases against Knight making practically the same charges as the one of which he was just acquitted, were continued to the April term

Knight was a member of the defunct cotton firm of Knight Yancey and Company of Decatur Ala

It was charged he issued forged bills of lading for cotton and thus defrauded buyers out of millions of dollars It was after this failure that Eastern financial interests cooperating with the Southern cotton handlers, took steps to insure the cotton trade against forged bills of lading Adequate means for this protection still are being discussed

Knight admitted on the witness stand that he drew bills of lading, without having the cotton but that all traffic officials of railroads gave him permission to do this and further than the cotton later

FIVE-CENT TIP IS SPURNED

Disappointed Taxicab Pilot Astonishes European Fare by Strange Disposition of Largesse

New York Women were discarding their wraps in the lobby of the St Regis at the dinner hour when a tall man from Europe entered the hotel through the huge revolving doors there was a loud rattle-rattle-rattle on the glass The man from Europe turned hastily and looking about asked the guard in gold braid

What was that?

I don't know sir I saw nothing sir the braided one replied

Very strange said the man in the lobby stepping up Quite a loud report Must have come from the outside

Ah there guard! Step out and see it ordered the assistant manager The man went out trembling

The result of his inquiry was astonishing to the man from Europe He had returned to the St Regis in a tramp taxicab and after paying his fare gave the chauffeur a dollar for himself The latter threw it with all his force at the glass door

I was thoughtless murmured the man from Europe Undoubtedly he is a gentleman chauffeur and too proud to take a tip

Good Eye Removed Sees

Carlisle Pa By removing his active eye Jacob Shields who has been blind in the other for 17 years has been enabled to see perfectly out of the one formerly defective

Recently Shields suffered a sudden attack of total blindness from the strain imposed on the good eye by the blind He was removed to a Philadelphia hospital and there the physicians determined that his good eye which had been affected would have to be done away with They discovered however that the blind eye was made so by a cataract That removed the blind eye regained its sight

Use of Sand Paper

Keep a piece of sand paper in the machine drawer for rough or blunted needles, a file, too, will quickly smooth a dull machine needle, and scissors may be sharpened on a large needle or the stem of a glass (or piece of glass) by opening and shutting quickly, as if you were trying to cut the glass

Sash Curtain Hint

When laundering sash curtains starch them only part way up as the rod can be more quickly inserted with less danger of tearing the curtains I find this a great improvement on the fully starched curtain

SANITARY WAY OF SWEEPING

Various Methods of Keeping Down the Dust When the Vacuum Cleaner Is Unavailable

Recently there has been developed a great improvement in housekeeping appliances—the vacuum cleaner It is not yet perfect but it contains great promise This innovation practically eats the dirt sucking it into its great tube of a throat, and depositing it in an air tight receptacle which may be emptied and cleaned out of doors If the cleaner is mechanically well constructed and susceptible of easy manipulation it is a valuable household invention

Whenever these more effective methods of removing dirt are for any reason temporarily impossible always remember that moisture makes dust not only less harmful but more manageable The old fashioned custom of sprinkling wet tea leaves over the carpet before sweeping was not done for hygienic reasons but to brighten the colors It was however unintentionally sanitary Newspapers torn up cut into bits and thoroughly wet answer the same purpose and are more easily obtained in the quantity desired In cases of illness existing in the room to be cleaned an excellent practice is to saturate these bits of paper with a solution of Platt's chlorides Electrozone, or a 20 per cent carbolic solution Dusting may be accomplished in a sanitary manner by using an oily cloth or, for some purposes, one moistened with water is better

Oil is becoming more and more one of the weapons of the sanitarian By its use the roads in some towns are kept almost free from the dust nuisance, and stagnant and mosquito breeding pools are prevented from contaminating the atmosphere —Woman's Home Companion

TO MAKE CLARIFIED BUTTER

Method of Purifying It Which Makes It as Good as Finest Florence Oil

The following are some of Dr Kitchener's butter recipes

Clarified Butter —Put the butter in a nice clean stewpan over a very clear slow fire watch it and when it melts carefully skim off the buttermilk etc which will swim on the top Let it stand a minute or two for the impurities to sink to the bottom then pour the clear butter through a sieve into a clean basin leaving the sediment at the bottom of the stewpan Butter thus purified will be as sweet as marrow—a very useful covering for potted meats, etc and for frying fish equal to the finest Florence oil

Burnt Butter —Put two ounces of fresh butter into a small frying pan When it becomes a dark brown color add to it a tablespoonful and a half of good vinegar and a little pepper and salt

Oiled Butter —Put two ounces of fresh butter into a saucepan set it at a distance from a fire so that it may melt gradually till it comes to an oil and pour it quietly from the dregs This will supply the place of olive oil and by some it is preferred either for salads or frying

ABOUT CURING MEAT

PROCESS A MYSTERY TO MOST CITY HOUSEKEEPERS.

Good Sized Piece of Meat May Be Bought Advantageously and Corned—Pickling and Drying Process Explained.

The method of keeping meats the year around is well known to farmers' wives, but a mystery to most city housekeepers. A good-sized piece of meat may be bought advantageously and corned, after cutting off a portion to be used in its fresh state. The rump is best to corn. Beef tongue, fresh ham, veal or mutton are excellent when corned.

A pickle for corning meat in small quantities is made as follows: Four pounds of coarse salt, eight quarts of water, two pounds of brown sugar, one-half pound of saltpeter; stir until salt and sugar are dissolved; then boil and skim, letting the mixture become cold before pouring over the meat. Turn the meat in the pickle every day for a week, which will give it a fine color and flavor. During the summer this pickle may be boiled over with an addition of one cup of salt and one cup of brown sugar to one quart of water, when it will keep sweet for several weeks. A plate or clean flat stone must be used to keep the meat beneath the pickle.

A large beef tongue will have to be kept in the pickle fourteen days before it is ready for use.

Dried Beef.—Select a round of beef and divide in two parts through the middle, rejecting the bone. For twelve pounds of meat allow one-half pound of fine salt, one-quarter ounce of pulverized saltpeter, and one-half pound of brown sugar. Rub this mixture into the meat every morning until it is all used up. At the end of this time hang up in the smokehouse for two weeks to dry. An excess of smoke will ruin the flavor.

Few people in the city have a smokehouse, and this method will be found a very good substitute. Drive nails around the top of a tight barrel, fill an iron pan or pail half full of ashes, build a fire on top of these. Hang the meat by a stout twine on the nails, place a board over the top of the barrel, and cover tightly with an old blanket. This method has been tried in the back yard of a city residence and found practical for smoking two hams, two pieces of beef, and two sausages.

It is to three families will club together and buy their meat wholesale at one of the packing houses they will find that their meat bills will be about one-third what it usually costs.

The LAUNDRY

Borax water will restore the gloss to sateen in washing.

Fine ginghams and percales will emerge from the tub with the gloss and dressing of new material if dipped in sweet milk instead of starch.

Ink stains are sometimes removed by soaking in sour milk and then rinsing in a weak solution of chloride of lime.

Try removing mildew by soaking in a weak solution of chloride of lime, then rinsing in cold water.

To erase all traces of scorch stains, wet the scorched place, rub with soap and bleach in the sun.

Use warm water to sprinkle starched clothes and the effect will be twice as satisfactory.

To remove stains of blood soak them in cold salt water, then wash in warm soapy water and finish by boiling.

Grass stains may be eradicated by saturating the stain with kerosene, then putting the garment in the wash tub.

Iron rust stains yield to the following treatment: Soak the stain in lemon juice, sprinkle with salt and bleach several hours in the sun.

Pepper Rice.

One pound of rice washed in cold water thoroughly. Boil in one quart of water for twenty minutes. Add salt. Strain through sieve and let cold water run on it same as for vegetable. Fry four strips of bacon very crisp. Add chopped onion, one red pepper chopped fine, six large tomatoes, skinned and chopped fine; put all into pot with rice and let cook slowly three hours until it is all dry and each kernel of rice is red and can be separated with a fork. This is a recipe for serving for ten persons. Economical and can be warmed over, and is better the second day than when fresh cooked.

To Keep Gas Stoves Polished.

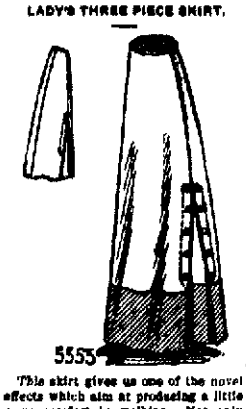

To keep sheet iron gas stoves polished and looking nice, go over them occasionally with some heavy oil, preferably lubricating or black oil, applying with a soft cloth. This will last twice as long as any blackening or polish. Be careful to avoid oils containing coal oil.—National Magazine.

Graham Biscuits

One and one-half cupfuls of graham flour, one-half cupful of white flour, one tablespoonful of brown sugar, one egg, one teaspoonful each of salt and soda. Wet with thin, sour cream. Roll one half inch thick. Bake slowly.

Girl Buried Alive.

The only daughter of a Bulgarian family at Ilfyuh after ailing some time, was found inanimate recently, and her parents, thinking her dead, had her buried, in accordance with local customs, the same evening. A few hours afterward a policeman passing the cemetery heard stifled cries from the newly-made grave. He ran to the parents' house and a large number of townspeople attended the exhumation only to find that the girl had died a few minutes previously from suffocation.

MADERO LAUGHS AS MEXICO IS SHAKEN.

Mexico City, Dec. 16. President Madero who recently proved his coolness by making a flight in an aeroplane, today demonstrated his ability to pass through the period of an earthquake without betraying signs of uneasiness. He was conferring with two of his cabinet ministers in the national palace when the seismic disturbance, which rocked a third of the republic, began. Score of the palace occupants ran into the streets but the President walked to a window, over looking the Zocalo, and there remained, laughing at the terrified hundreds who ran aimlessly about the big square or sank to their knees in prayer.

The first shock here was felt at 12 40 and lasted for a few seconds more than two minutes. The instruments registered an oscillatory movement from southwest to northeast.

Reports received tonight indicate that the movement was felt as far north as Guanajuato and as far south as the isthmus of Tehuantepec and from ocean to ocean. In no place was loss of life reported though in the state of Guerrero, especially in Chilpancingo, the movement was much greater, being a trepidatory character. A few flimsy buildings were thrown down.

In the capital, telegraph and telephone wires were snapped, and for a time wires were snapped, and for and electric power on account of the breaking of the cables, but aside from the throwing down of a few adobe walls, no serious damage was done.

HONEY IS VERY WHOLESOME

Real Value Be Out of Proportion to Cost It Should Be on Every Table.

Most suburbanites would keep a few hives of bees if honey values were better understood Even when the honey must be purchased its real value is so out of proportion to its cost that it should be included among the every day necessities

Comparatively few housewives use honey as a substitute for sugar in cooking, but managers of large bakeries, always on the alert to find the best and most economical ingredients to use in their productions value it at its true worth, and use it in making their choicest products because it produces a variety of flavor It produces lighter and finer cakes, and those in which it is used have superior keeping qualities

Honey is in the fat, heat and energy producing class of foods

Many people who do not keep bees and a few that do consider honey a luxury when if freely used it will save enough of either butter or sugar to much more than equal its cost For example Have a pitcher of strained honey at hand and as each cake is taken from the griddle pour honey over it and fold like an omelet The result will be cakes that will be simply delicious without the use of butter—and every housewife knows that hot cakes call for a great deal of butter when that is used

Honey has greater sweetening power than sugar and less is needed In a sponge cake that would call for a cupful of sugar three fourths of a cupful of honey is sufficient to make such a cake beat the three fourths of a cupful of honey with the yolks of three eggs beat in one cupful of flour a little at a time then add four tablespoonful of hot water and lastly fold in the stiffly beaten whites of the three eggs with any flavoring desired

CARE OF THE DINING ROOM

Should Always Be Opened and Aired and Dusted Before Breakfast

A dining room should always be opened and aired and dusted before breakfast It may be only a superficial dusting, if time is short and the more thorough cleaning may be deferred until later. If the table has been set the night before a light cloth should have been thrown over it to protect the dishes glasses and silver from the light dust which will settle during the night and this cloth should not be taken off until the carpet sweeper has been run over the floor and the dust wiped from the larger pieces of furniture Before anything else is done the windows should have been opened wide If the weather is very cold, ten minutes airing will suffice

Grease spots which occasionally occur on the carpet about the table may sometimes be removed by sponging off the spot with a mixture of one part of common salt to four parts of alcohol Rub the spot hard If gravy or something heavy with fat has been spilled, lay a piece of soft paper on the spot, and pass a hot flatiron lightly over it Repeat the process several times, using a fresh part of the paper every time

DOG HAS COSTLY GOLD TEETH

Little Mexy Had Bad Toothache and His Owner Gave Him Brand New Set of Incisors

Chicago—In the future when Mexy's playmates laugh at him for having no hair he will open his mouth in a yawn carelessly displaying a mouth full of gold teeth that would fill the soul of some people with envy The set of bridgework cost $112

At least those were Mexy's plans when he was interviewed Not that he was so blasé as to see anything about his teeth In fact he said nothing, intelligible to the average man for he is a Mexican dog.

He belongs to Dr Henri Grosser a student at the Western Dental college and lives with Grosser and his wife at 1111 La Salle avenue.

Dr Grosser took Mexy from the refuse of the Anti Cruelty society several weeks ago and soon afterward discovered that the dog was suffering from toothache.

An examination disclosed the presence of two abscessed incisors and several other teeth that needed attention

The basement of the Grosser home was turned into an operating room with Mexy as the patient and Dr Grosser the dentist

Mexy seemed to know that I was doing what was best for him Dr Grosser said and although he objected a good deal at first, he gave me no trouble after the teeth were out It was a great relief to him you see for as soon as I had removed the teeth the pain stopped

He used to be perfectly still when I was taking the impressions and made no trouble, even when I was fitting the new teeth in place They are good and sound too and not a dog in Chicago is better able to chew bones and meat than he.

By reason of his teeth Mexy has become one of the celebrities of the neighborhood
